### Open Ended Responses

Written Comments (7 comments)

**Q: What useful feedback could you provide the professor of this course? (Please be specific.)**

1 I enjoyed the class a lot professor. I learned a lot about cocoaNEC and found out I was interested in this aspect of physics.

**Q: What were the best aspects of this course? (Please be specific.)**

- 1 I really liked going through each model and applying variations and observing the result of it. I also really enjoyed the process of correcting myself along the way and seeing my mistakes and learning from you.

**Q: What would you change about this course? (Please be specific.)**

- 1 I would not change anything about the course.

**Q: Please evaluate your own performance in this course. That is, are you satisfied with your accomplishments in this course? If not, what should you have done differently to improve your performance and/or comprehension of the course material.**

- 1 I am happy with what I learned in this course and given that we were able to do it despite being remote. If we had been in person I am sure we could have done more but given the circumstances, we were able to complete what we wanted to do.

**Q: How much, and in what ways, was your evaluation of the course affected by the shift to online teaching?**

- 1 It was not affected at all by the shift. Professor Hanson was actively communicating with me and helping me out so it did not change much.

**Q: What did the professor do to change the course to an online format?**

- 1 We communicated often via email and broke the project into several small parts. I was able to accomplish one small part at a time and finish it by the end of the semester. We also spoke virtually on zoom calls.

**Q: Focusing specifically on the online portion of the course, what worked well and what worked less well?**

- 1 The constant emails and zoom calls helped a lot.
